Diligent Labs facilitated the implementation of the Joint Capabilities Integration and Development System (JCIDS) with a U.S. Army veteran team comprised of a liaison officer and training analyst embedded within the Polish Territorial Defense Forces (TDF) Headquarters in Warsaw—a two-star command with over 25 unique brigades, training centers, and logistical units. Leveraging our internal technical approach and analysis, we successfully brought the TDF to NATO standards of corps, division, and brigade interoperability with U.S. Forces. After just one year, the TDF achieved NATO certification for six of its twenty territorial brigades for the first time in its history, demonstrating our ability to deliver results under complex operational frameworks.
